# LinkedIn Pathways

A personalised career-growth platform

Product Owner: Abrar

© 2024 Udacity.

# Executive Summary

- Career change is accelerating, but people still stitch together fragmented advice, courses and networking.

- LinkedIn Pathways turns a member profile and career goal into a measurable skill plan, then connects learning to credible opportunities.

Ask: fund a 12-month MVP for 1.0M invited members and 50 employer partners.

# Background

## Why are we here?

Career growth is surrounded by content, but professionals still struggle to decide what to do next.

The World Economic Forum estimates that 39% of workers' skills may change or become outdated by 2030.

LinkedIn already connects people, skills, roles and companies, creating a strong foundation for personalised career guidance.

**From profile to progress.**

# Business Case

UDACITY
Part of Accenture

# Initial Focus

## The gap is confidence, not content

- LinkedIn already knows a member’s skills, interests and professional graph, yet career growth still feels like guesswork.

39% of workers’ current skills may change or become outdated by 2030.
Members need a clear next step, not another catalogue of courses.
Start with mid-career digital professionals in the UK, US and Canada.

Call to action: approve discovery and a 12-month MVP.

# Opportunity

## Skills change faster than plans

- Modeled TAM: 1.2B members × $60 annual net revenue = $72B.

- Beachhead: 10M mid-career professionals in the UK, US and Canada.
- Year one: invite 1M and activate 100,000, or $6M modeled revenue.
- Adjacent proof: Coursera reports 197M registered learners.

- $60 is a model assumption, not observed market revenue.

Sources: LinkedIn News, Q4 FY25 highlights; Coursera 2025 Form 10-K; assumptions labelled.

# Proposal

## One plan from profile to progress

- LinkedIn Pathways combines a skills graph, a goal-based plan and opportunity proof.

Diagnose: compare profile skills with target-role requirements.

Recommend: rank courses, projects, certifications and people to meet.

Coach: show weekly actions and explain why each matters.

Prove: turn completed work into verified profile signals.

Target users: mid-career professionals changing role or industry.

# Return On Investment

## A small bet can pay back quickly

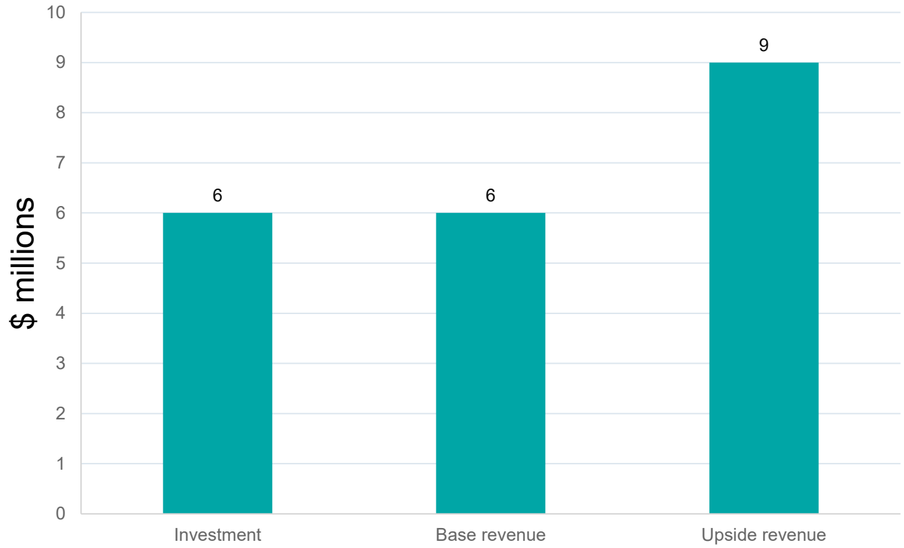

- Investment: $6.0M for 12 months.

Base: 100,000 members × $60 = $6.0M revenue.

Base ROI: 0%.

Upside: 150,000 members = $9.0M, or 50% ROI.

Scale only if activation exceeds 10% and 90-day return exceeds 35%.

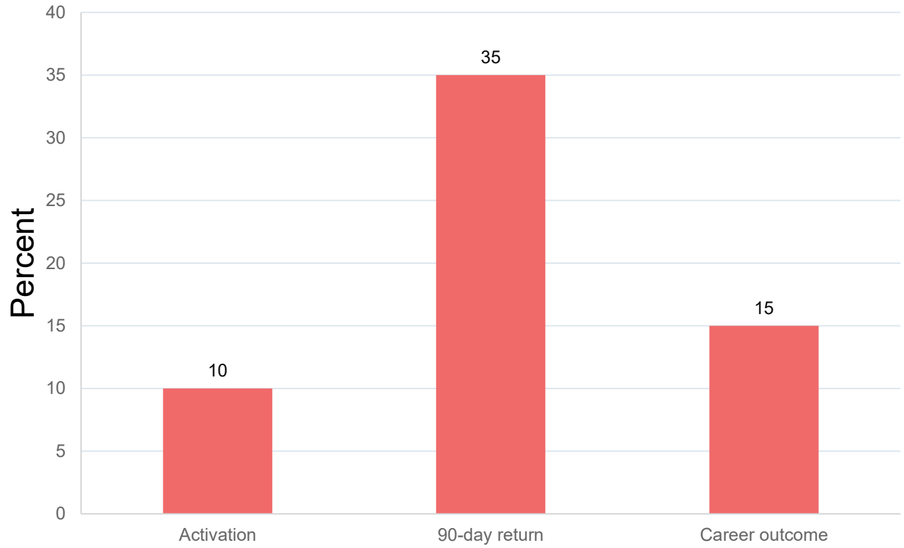

# Measurement

## Activation and outcomes matter

- First-year goals:

- 1.0M invited and 100,000 activated.
- 35% return in 90 days.
- 25% complete an action in 30 days.
- 15% report a career outcome in six months.
- 50 employer partners.

- Guardrails: quality, fairness, privacy and conversion.

# Competitors

UDACITY
Part of Accenture

# Coursera

## Learning catalog leaders

- Coursera offers a broad learning marketplace with:

- University and industry courses
- Professional certificates and degrees
- Skills tracks and personalised discovery
- Consumer and enterprise plans

- Its 197M registered learners prove demand. Its gap for LinkedIn is the missing professional graph and live hiring context.

Source: Coursera 2025 Form 10-K / SEC; competitor feature summary is directional.

# LinkedIn Learning + Udemy

## Career tools and marketplaces

- Two adjacent products validate demand, but each leaves a gap.

- LinkedIn Learning
- Video courses and assessments
- Skill recommendations
- Certificates and badges
- Enterprise learning plans

- Udemy Business
- Broad course marketplace
- Practice and assessments
- Technical content
- Enterprise analytics

- Pathways adds target-role planning, live labour-market context, network actions and verified proof of work.

Source: LinkedIn Skills Signal Report 2025; positioning and differentiation are model hypotheses.

# Our Advantages

## LinkedIn can connect the missing pieces

- Why us:

- First-party professional graph: goals, skills, roles, companies and relationships in one context.
- Live labour-market signals: recommendations reflect changing demand, not a static curriculum.
- Opportunity proof: projects and credentials become portable profile evidence.
- Two-sided value: members gain direction while employers find emerging skills.

- Positioning: the career operating layer between learning and work.

# Roadmap and Vision

# Roadmap Pillars

## Make career growth feel navigable

- Vision: every professional can see the next credible step in their career and make measurable progress toward it.

- Year-one strategy has two themes:

- Personalised skill intelligence
- Trusted pathways and momentum

- A third theme follows after product-market fit: employer signal and internal mobility.

# Theme 1: Personalised skill intelligence

## Skill intelligence

- Three connected features make the recommendation explainable.

- Goal-to-skill map: translates a target role into a shortfall view.
- Market pulse: refreshes priority skills from current role and hiring data.
- Next-best action: ranks one practical learning or networking step each week.

# Theme 2: Trusted pathways and momentum

## Progress that compounds

- Three features turn advice into sustained behaviour.

- Curated pathways: combines LinkedIn Learning, partners and member-created projects.
- Proof of work: captures assessed outputs, endorsements and verified credentials.
- Progress coach: uses reminders, reflection and outcomes to adapt the plan.

# Theme 3: Employer signal and internal mobility

## Expansion after proof

- Build after the member loop works.

- Skills-first matching: helps employers search beyond titles and degrees.
- Internal opportunity exchange: surfaces adjacent roles and projects.
- Partner analytics: shows which pathways produce interviews, moves and hires.

# Partners and go-to-market

## Start narrow, then widen the scope

- Launch with 50 employer design partners and 1M invited members.

- Partner roles:
- Learning providers supply courses and credentials.
- Employers provide role signals and pilot cohorts.
- Credential partners verify proof of work.
- Then expand into employer-sponsored plans, internal mobility and career transitions.

- **Decision**: fund discovery and return with an MVP gate in 90 days.
